

EDUCATION

| Degree           | Institute                                            | CGPA/Percentage     | Year         |
|------------------|------------------------------------------------------|---------------------|--------------|
| B.Tech (CSE)     | Indian Institute of Information Technology, Guwahati | 8.09 (Till 4th Sem) | 2022-present |
| Senior Secondary | Hariyana Vidya Mandir                                | 90%                 | 2021         |
| Matriculation    | Welland GouldSmith School                            | 93%                 | 2019         |

EXPERIENCE

- **Megh9 Technologies**

*SWE Intern*

*Apr 2024 - July 2024*

– Spearheaded the enhancement of the company’s website by debugging critical issues and integrating five new features; these improvements led to an increase in user engagement and positive feedback from customers.

– Streamlined the bug resolution process by creating a standardized reporting system, which significantly decreased average bug resolution time; enabled faster deployment of website features.

– Engineered a responsive web application using ReactJS, HTML, and CSS; deployed features that are now utilized by over 1k users weekly, enhancing real-time customer interaction and support capabilities.

PROJECTS

- **Email Generator**

*Llama2 ,streamline*

*Mar 2023*

**Github**

– Designed an innovative email generation tool with Llama2, automating the customization of over 2,000 email templates based on user-specific data, which streamlined the communication process and increased user satisfaction ratings.

– Deployed a seamless web interface with Streamlit, enhancing user engagement for the email generation tool; utilized real-time analytics to achieve a major increase in user satisfaction ratings.
- **Natours**

*Node.js, JSON API*

*Feb 2023*

**Github**

– Developed a comprehensive tour booking platform for Natours, simplifying navigation and increasing user retention, while also ensuring that the platform met accessibility standards for all users.

– Created a secure login page utilizing JWT authentication, which reduced login time by few seconds per user; streamlined the payment process, enhancing customer satisfaction.
- **Kartify**

*ReactJS, FireBase, Context API*

*Dec 2022*

**Github**

– Architected an interactive e-commerce website with React.js that incorporated real-time inventory tracking; the solution now supports over 1,000 concurrent users and has enhanced overall user satisfaction ratings.

– Pioneered an efficient asynchronous programming model for API integration that streamlined exercise data fetching; facilitated seamless data access for multiple fitness app users daily, improving overall customer experience and service efficiency.

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Python, Java

• **Tools and Frameworks:** React.js, Node.js, HTML, CSS, Bootstrap, MySQL, MongoDB

• **Skills:** DSA, SQL, Artificial Intelligence

• **Coursework:** Introduction to C/C++, Data Structures and Algorithms, Operating System, Database Management System, Computer Architecture and Organization, Artificial Intelligence, Discrete Mathematics

CERTIFICATIONS

- **100 Days of Code: The Complete Python Pro Bootcamp** Udemy

• **Machine Learning Specialization** DeepLearning.AI

• **Responsive Web Design** freeCodeCamp

POSITIONS OF RESPONSIBILITY

- **Club Coordinator**,Machine Learning (Mavericks), IIITG

• **Sponsorship and Finance Team Member**, Yuvaan, IIITG
- Jan. 2024 - Jul. 2024*

*Dec. 2022 - Mar. 2023*

ACHIEVEMENTS

- **Flipkart Grid 6.0**,Cleared level 1

• **Solved 500+ questions across all coding platforms**,LeetCode, GeeksForGeeks, Codeforces, Codechef
- Ongoing*
