EDUCATION

Indian Institute of Information Technology, Guwahati

Bachelor of Technology, Computer Science and Engineering

Expected May 2026

Current CPI: 7.68/10

- **Coursework:** Data Structures & Algorithms, Computer Organisation & Architecture, Operating Systems, Database Management Systems (DBMS), Computer Networks, Applied Machine Learning, Artificial Intelligence, Cloud Computing

EXPERIENCE

Innovation and Entrepreneurship Cell, IIIT Guwahati

June. 2023 – Present

Event Management Team Member

- Contributed to event management with strong communication and organizational skills.
- Assisted in planning and executing multiple entrepreneurship workshops and seminars, ensuring smooth operations from start to finish.
- Coordinated with speakers, sponsors, and vendors, maintaining effective communication to meet event objectives and timelines.

PROJECTS

Mess Management System IIITG (Ongoing) 🌐 | MongoDB, React+Vite, Restful APIs

June. 2024 - Present

- Leading development of a Mess Management System for 1000+ students at IIIT Guwahati, enhancing operational efficiency by 20%.
- Introduced real-time mess menu display, Payment Gateway Integration, and Complaint Portal, reducing complaint resolution time by 30%.
- Implemented Agile-based Evolutionary Model for streamlined operations and user-centric design, ensuring continuous stakeholder involvement and effective SDLC application.

Invoicify 🌐 | Next.js, MongoDB, Tailwind CSS, Nodemailer

Jun. 2024 - Jul. 2024

- Implemented SaaS invoice generator leveraging Next.js and MongoDB. The application includes robust user authentication, allowing users to securely create, download, save, and send invoices via email. This tool streamlines invoicing processes, ensuring efficient and secure management of billing activities.
- Designed and implemented responsive user interfaces using Tailwind CSS, achieving a smooth UI experience across various device types.
- Utilized Nodemailer to automate email notifications for invoice generation and delivery, ensuring timely communication with users.

CodeAce 🌐 | 🌐 | Next.js, TypeScript, Tailwind CSS, Firebase

May. 2024 - Jun. 2024

- Coding platform with Next.js, Typescript, Tailwind CSS, and Firebase. Includes features like user authentication, problem viewing, code submission, liking/disliking problems
- Integrated Firebase authentication and optimized the application's performance by 25% through efficient data handling and Next.js server-side rendering, reducing page load times and improving responsiveness.
- Implemented a real-time code submission and evaluation system, enabling users to submit code for problems and receive instant feedback on their solutions.

SKILLS

Programming Languages: C/C++, Python, Java, JavaScript/TypeScript, SQL

Databases: MySQL, PostgreSQL, NoSQL (MongoDB), Firebase Services

Frameworks: NodeJS, ExpressJS, ReactJS, TensorFlow, Android SDK, AWS, Git

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOPs), Networking (TCP/IP), Machine Learning, Linux, Microservices, Cloud Computing, RESTful APIs
